Flat Head Screw Kit for VEL1414MKT

When installing the VEL1414MKT Magnetic Universal Light Kit on an Automatic Products glassfront vendor, we recommend that you replace 2 of the rounded head screws located next to the glass with the flat head screws provided with the kit (Figure 1).

There are 4 screws included with the kit. You will need 2 screws for each side of the glass. Replacing these screws will allow the magnetic light bar to sit flush on door (Figure 2).

If you have any questions, please call the Vendors Exchange Parts Department at 1.800.321.2311.

Figure 1 Red circles mark which screws you will be replacing.
